# Facilities CIP Agenda

- 1 Facilities CIP Funding Groups
- 2 County Facilities CIP FY26-31 Overview
- 3 Major Capital (MC) Project Details

# Facilities CIP Funding Groups

## Major Capital (MC)

- Projects greater than \$500,000
- Ex: New buildings, comprehensive renovations, large roof, etc.

## Critical Infrastructure (CRI)

- Projects at critical facilities that target repairs/replacements/improvements to assets that are essential for the facilities to function
- Ex: Generators, electrical systems, IT cooling systems, alternative water sources, etc.

## Facilities Repair and Renovation (FRR)

- Projects between \$200,000 and \$500,000
- Ex: Major equipment, control upgrades, office suite renovations, generators, etc.

## Operating Capital (OC)

- Projects less than \$200,000
- Ex: Small equipment repair/replacement, small office renovation, carpet, painting, etc.

Does not include estimates for UC Jail.

# Union County Jail

FY2027 - \$TBD

## **Project Status:**

The Facilities CIP is carrying the initial estimate for a 500 bed/600 core facility in its entirety in FY2027. This will be adjusted per Board direction after the Jail Study is completed.

Next phase of the Jail Study will provide:

More refined estimates for two options, 400 bed/600 core and 500bed/600 core.

Operational cost models based on the two sizing options.

Target date for completion of this phase is May 1, 2025

# UC Jail Roof Replacement

FY2027 - \$675,000

**Project Scope:** The project includes the replacement of approximately 24,000 square feet of existing roofing at inmate housing areas. The basis of design will include a modified bitumen roof system.

**Project Justification:** The existing roofing system has exceeded its useful life. It is aged, damaged and has active leaks. Roof blisters are becoming more and more common and require immediate repairs to limit damage to the inside of the building.

## Project Budget

Design	\$54,173
Construction	\$547,191
Contingency	\$54,720
<u>Owner Reserves</u>	<u>\$18,916</u>
Total Budget	\$675,000

Note: Approval of the construction of a new Jail would allow this project to be removed from consideration in the CIP. The existing roof's life would be extended as needed through continued patching and repairs.

# Cane Creek Park – Outdoor Rec Center and Storage

FY2027 - \$865,000

**Project Scope:** The project would include a new structure of approximately 2,000 gsf. The building would include dedicated storage space for park supplies, materials and equipment, office space for the full time and seasonal staff and a meeting space for on-site events and programs for the public.

**Project Justification:** The Outdoor Recreation Department has evolved, since 2018, from a team of one staff member to a team of eight staff members to meet the current demand of an increasing customer base. The members of this department are currently utilizing a multi-use space at the park for their office and meeting space. The amount of program and event supplies and materials have increased to keep up with the increased demand for services. These supplies consist of but are not limited to: arts & craft supplies, small hand tools, all terrain recreational vehicle, kayaks, paddleboards, archery equipment and outdoor movie equipment.

## Project Budget

Design	\$61,380
Construction	\$620,000
Contingency	\$62,000
<u>Owner Reserves</u>	<u>\$121,620</u>
Total Budget	\$865,000

# Progress Building – Building and Site Improvements

FY2027 - \$2,900,000

**Project Scope:** The project is to develop several site improvements to support the various functions operated at the Progress Building. The improvements will include improved parking and roads at the rear of the building, construct a single bay vehicle wash station and vehicle fueling station. The project may also include the addition of a vehicle entry point for transportation vehicles on the north side of the building and a connecting roadway to the rear of the building. Existing pavement would be replaced, exterior lighting improved and required storm water management devices installed.

**Project Justification:** The project is focused on improving site conditions at the rear of the building that supports deliveries and access to interior parking for Transportation services, and Emergency Management and Sheriff's Office mobilization equipment storage areas. The existing circulation creates some potential driving hazards related to high volumes of trips by the Transportation department. Existing pavement is also in poor condition.

## Project Budget

Design	\$192,782
Construction	\$2,117,171
Contingency	\$174,823
<u>Owner Reserves</u>	<u>\$415,224</u>
Total Budget	\$2,900,000

Note: The fueling station has also been identified as a CRI project. Scope can be modified as needed if the CRI project is approved.

# Agriculture Center – Office and Support Expansion

FY2028 - \$7,500,000

**Project Scope:** This project will include an addition for Ag Extension office of approximately 3,200 gsf, an addition for event space support of approximately 2,200 gsf and a general renovation of about 14,000 gsf of the existing building. The office expansion will be built at the west face of the building and contain various offices and support spaces for Ag Extension staff. The event support addition will be built at the south face, contiguous to the event/banquet halls and contain space for event check-in, support and coordination. The renovation of existing spaces will focus on renewal of finishes including flooring, ceilings, painting, restroom fixtures and some event lighting.

**Project Justification:** The project will address current space shortages in the Ag Extension offices that have seen several storage spaces be converted to office space. Some offices are currently used to seat more than one person. This has created a storage issue and there are no additional options to address current and future space needs. The 2022 facilities master plan identified space needs for the Agriculture Center over the next 20 years that included the need for an additional 5,394 sf. These needs were targeted for Ag Extension office staff and Ag Center Event Support staff.

## Project Budget

Design	\$455,616
Construction	\$5,557,258
Contingency	\$439,800
Owner Reserves	\$1,047,326
Total Budget	\$7,500,000

# Progress Building – Warehouse B Roof Replacement

FY2030 - \$600,000

**Project Scope:** The project includes the replacement of approximately 34,000 square feet of existing roofing at the Warehouse B section (original warehouse) of the building. The basis of design will include a simple exposed fastener roof system.

**Project Justification:** The existing roofing system has exceeded its useful life. It is aged, damaged and has active leaks. Roof leaks at failing fasteners and corroded metal are becoming more and more common and require immediate repairs to limit damage to the inside of the building and stored items.

## Project Budget

Design	\$47,124
Construction	\$476,000
Contingency	\$47,600
<u>Owner Reserves</u>	<u>\$29,276</u>
Total Budget	\$600,000

# Patton Avenue – Parking and Stormwater Improvements

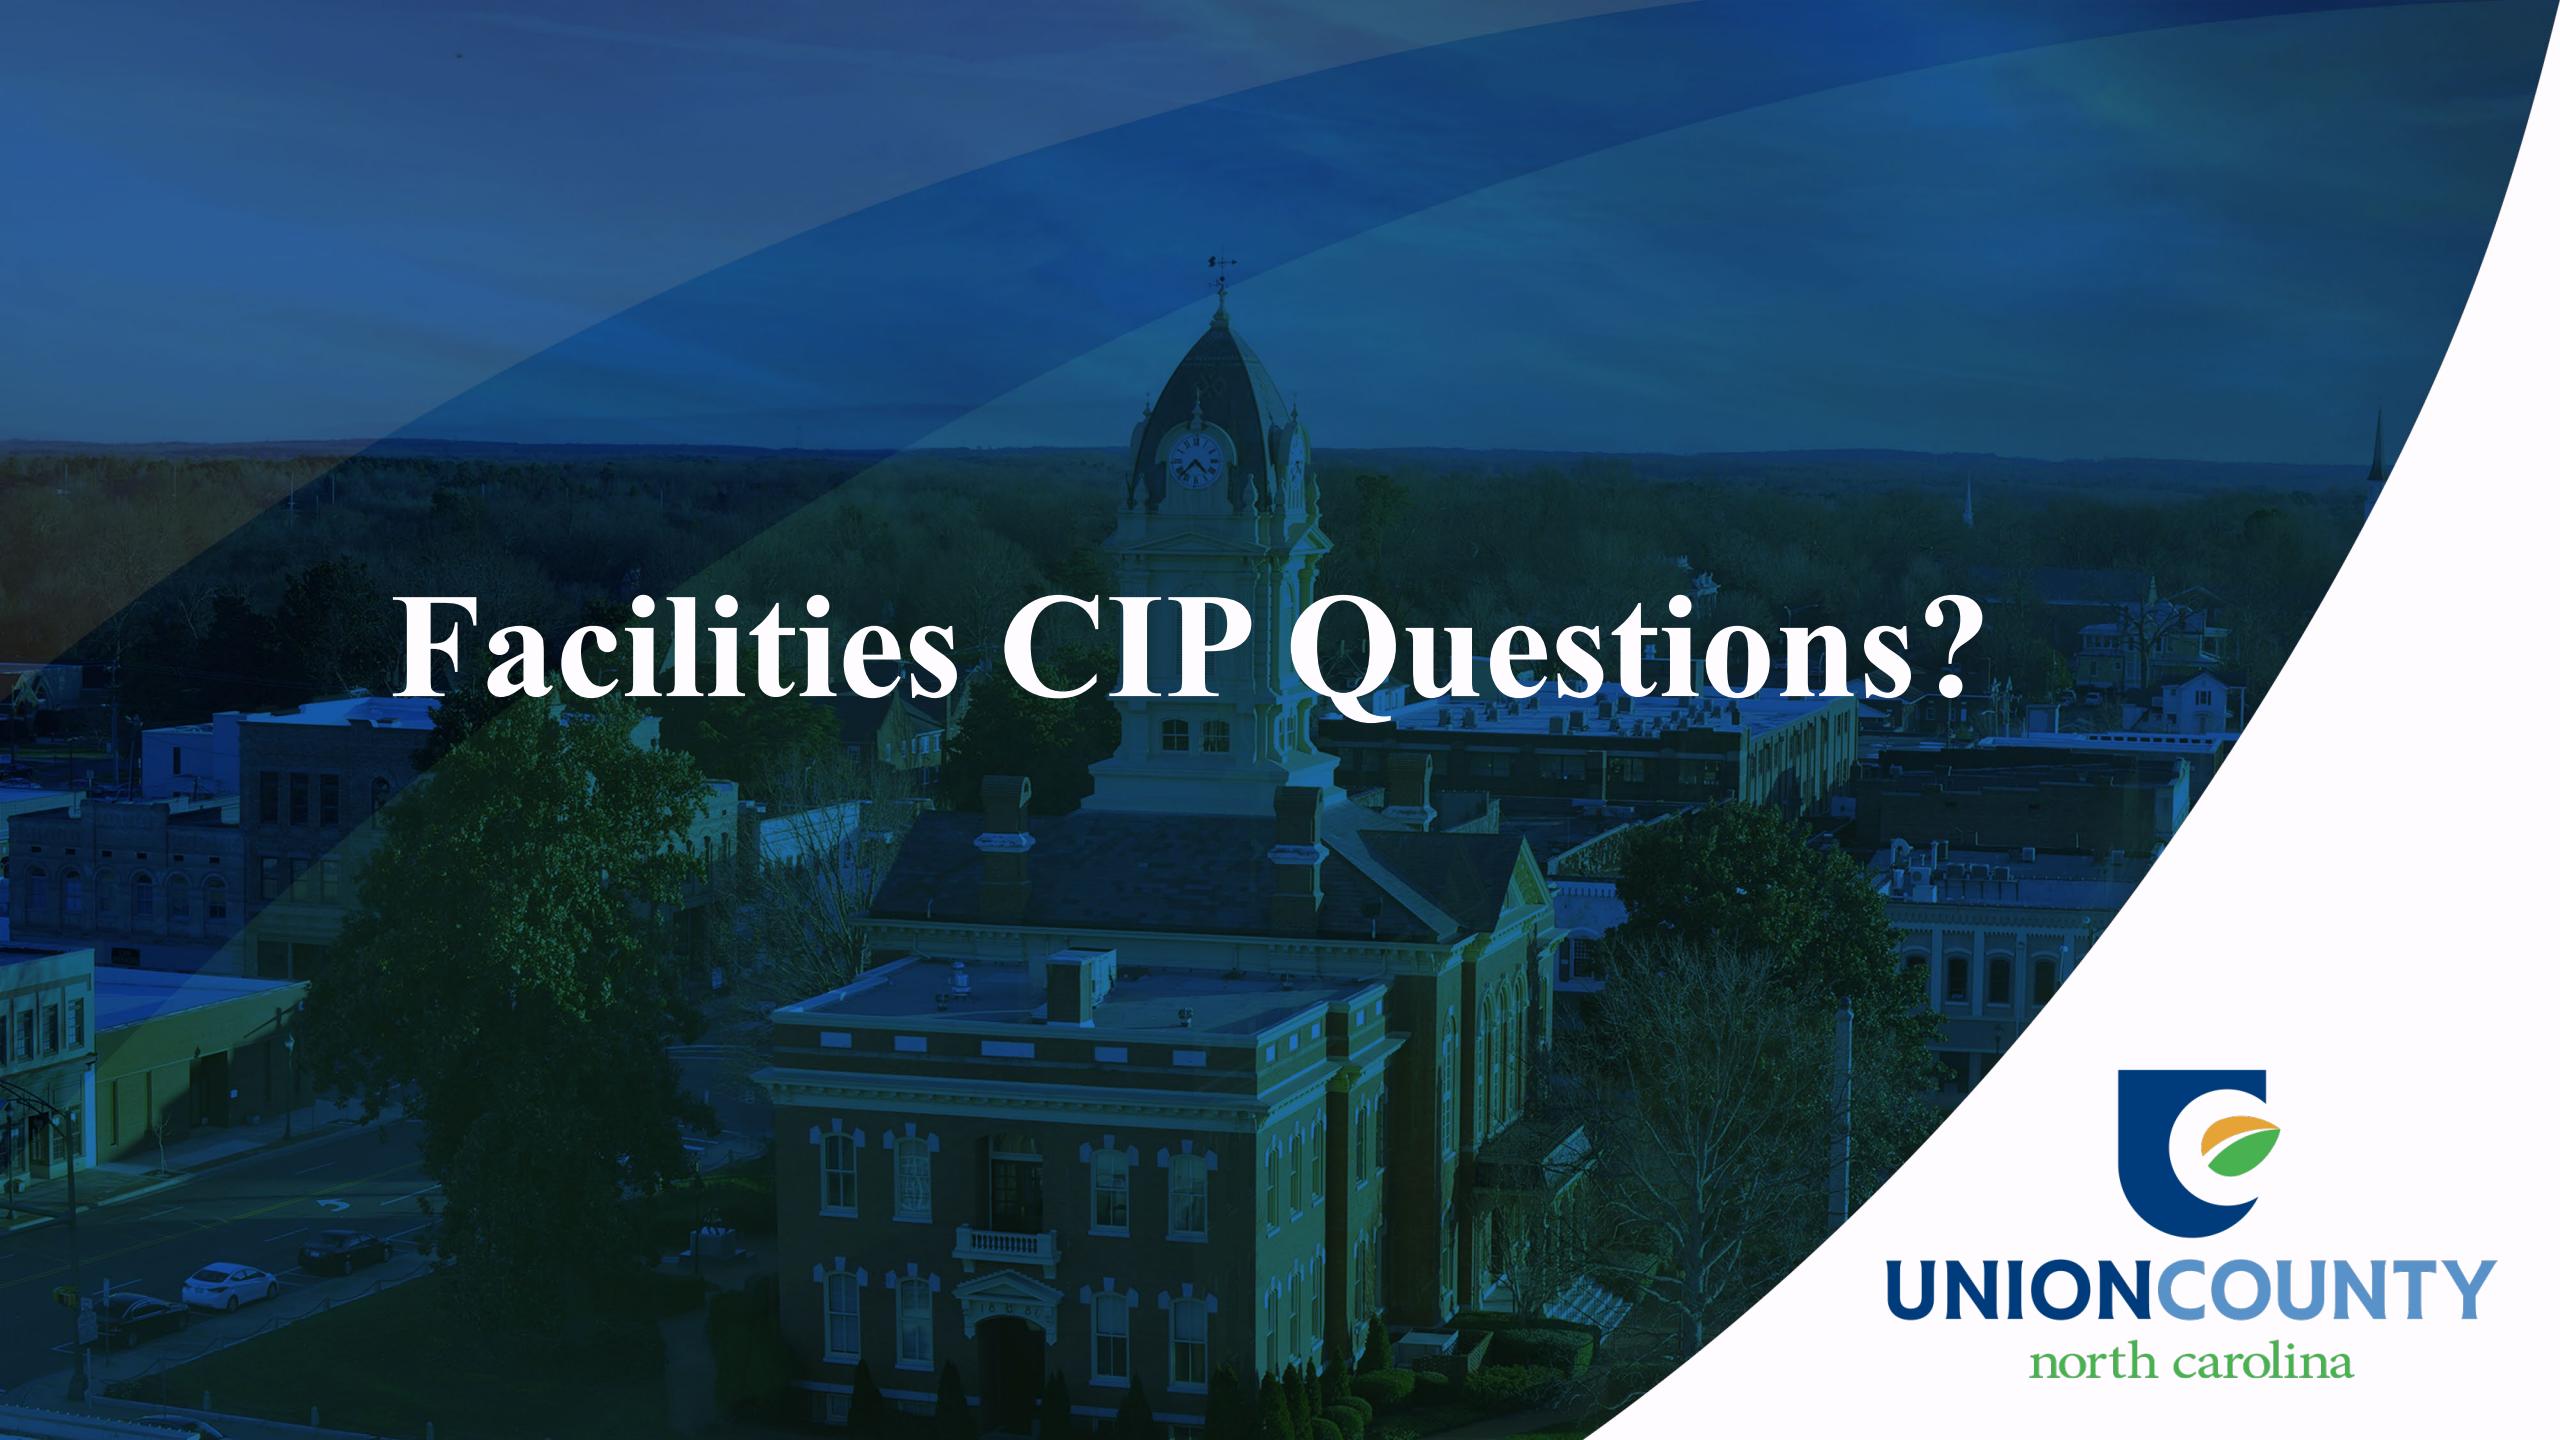

FY2031 - \$850,000

**Project Scope:** The project includes installing approximately 40,000 sf of asphalt pavement at the rear of the complex. A new storm water management device will also be required due to the increased impervious surface area. Parking bumpers, pavement marking and signage will also be installed.

**Project Justification:** Patton Avenue is the location for our Fleet Management and Emergency Vehicle Equipment Installation Shops. Parking for county fleet customers, storage of newly delivered vehicles awaiting processing, surplus vehicles, emergency vehicles awaiting equipment installations, wrecked vehicles, trailers and other large equipment is limited and has required the use of the area at the rear of the complex. The existing site at the rear is primarily grass surfaces with some graveled areas. The movement of vehicles when the area is wet or damp is difficult if not impossible. The area lacks any means of vehicle delineation that would help optimize the use of the area. A parking study was completed in 2024 that identified the need to pave the area and mark/sign spaces to most effectively use the area for parking and storage.

## Project Budget

Design	\$55,600
Construction	\$695,000
Contingency	\$69,500
<u>Owner Reserves</u>	<u>\$29,900</u>
Total Budget	\$850,000

A nighttime aerial photograph of a small town. In the center is a large, ornate building with a prominent clock tower and a green dome. The town is surrounded by trees and other buildings, with a road and a few cars visible in the foreground.
